

Comment # 1 Lehigh has not been a good neighbor. See Violations

Comment #2 Don't like Lehigh operations. Last BAAQ report is dated 2016. ACIENT INFO.

Comment #3 Time & Situation Change. Permits to operate were reasonable (profitable?) then. Cupertino & Silicon Valley are changed and have different perspectives. Lehigh Hanson and today's residents' interests collide.

Comment #4 Opportunity to address our neighbors.

Comment #5 The City needs to be aware of what kind of material is being transported on City streets. Some assurance needs to be made that no toxins are introduced in the fill.

Comment #6 Appropriateness of expansion. Lehigh pit fill.

Comment #7 Please advertise joining the eMail list in the Cupertino Courier. Also advertise these meetings in the Cupertino Courier. Thank you for hosting the meeting.

Comment #8 This is 2019. Lehigh is not a good corporate citizen. They continue to violate the rules. I often ask myself what technical talent they have overseeing their operations. Silicon Valley has changed, and the residents of Monta Vista carry too much of the burden for the construction going on in the Valley.

Comment #9 Concerns regarding heavy concentration of dust - ongoing dust pollution.

Comment #10 Just say no to Lehigh modifying the ridgeline. It is time Lehigh filled in the pit with their waste material and stop the destabilization.
